

**Paraffin wax protective wax YAV-1** – used in the tire industry. Protective wax paraffin oil YAV-1 is a fraction of solid hydrocarbons obtained by mixing paraffin and ceresin.

## Typical physical and chemical properties

Parameter	Method	Values
Density at 20 °C, г/см <sup>3</sup>	GOST 3900-85	0,829
Kinematic viscosity at 100 °C, мм <sup>2</sup> /с	GOST 33-2016	7,5
Refractive index at 70 °C	GOST 18995-89.2-73	1,4427
Water content, %	GOST 2477	vestige
Melting temperature, °C	p. 3.2 GOST 23683-89	66
Mechanical impurities content, %	GOST 6370-83	0,005
